

How to download image assets (option 2)

Example post

Option 2: Image Downloader Extension

- 1 Download Chrome Extension: [Image Downloader Chrome Extension](#)
- 2 Navigate to social post in desktop browser.
- 3 Click the Chrome extension button in your browser. Enter “scontent” in the filter. **For FB Link and TW posts: do not use any filter.**
- 4 Find the image assets (primary image and brand profile image). Click the download button in the top-right corner.

Note: This approach also works for retrieving the video poster image.
